NEWS RELEASE

FUELTRAX APPOINTS JOHN DONOVAN AS NEW DIRECTOR OF GLOBAL OPERATIONS

Donovan came on board in May 2018 as Director of Global Operations for FUELTRAX, the leading marine fuel management solution, to boost coordination with global clients in responding to their changing needs.

Donovan's first initiatives with FUELTRAX have been to coordinate global clients, operators, and installation teams to safeguard the interests of all stakeholders in mission-critical fuel monitoring processes and controls.

Recognizing the importance of the crew as a crucial stakeholder in efficient operations, Donovan's next initiatives will be to host crew-symposiums for training, feedback, and improvements to the system to the benefit for the crew. "The operational end user is always the most important part of the equation. Increasing their ownership of the product and gaining their direct feedback is critical to the continued evolution of the product," says Donovan.

Through oversight of global regulatory compliance efforts such as EU MRV, IMO DCS, and international classification requirements for FUELTRAX vessel owners and operators, Donovan ensures FUELTRAX installations and services are preformed in accordance to governing laws and regulations internationally.

A professional mariner and former Maritime Operations Officer for the Department of the Navy, Donovan is a skilled vessel pilot, and has deep experience in operational planning, maritime command and control (C2), and contingency management. As a reserve officer, he has activated and deployed to lead maritime operations and programs for US Navy Special Warfare units around the globe.

Graduating from State University of New York Maritime College with a BS in Marine Transportation in 2002, and receiving his direct commission into the Navy Reserve in 2006, he has also received several awards, including the Defense Meritorious Service Medal.

FUELTRAX founder and CEO, Anthony George, says, "Donovan's skills and experience bring a new edge to the company's objectives of ensuring fuel security and regulatory compliance, and optimizing the performance of FUELTRAX client vessels.

"We look forward to having John join us as a very qualified addition to the FUELTRAX global team, supporting us as we expand – maximizing opportunities for existing customers to optimize performance and introducing new clients to the leading universal fuel management solution."
